- *Front-end Engineer Career Path - View Certificate*

Pirple -
- *C# Fundamentals - View Certificate*
- ES6 - View Certificate
- Node.js - View Certificate

Udemy -
- *Agile Bootcamp - View Certificate*

EXPERIENCE

Thoughtware
Application Developer   *July 2023 - present*
- Application developer at Thoughtware in charge of one of our in-house Customer Relationship Manager Apps (CRM Apps) as well as early stages of development for WhatsApp Food Ordering Bot for DairyBelle restaurants.
- CRM Apps uses Xamarin and C# to create builds for IOS, Android and UWP and uses .NET Core Web Api (implementing Domain Driven Development and Clean Architecture) to communicate with our MySQL database.
- Responsibilities further include any implementation of new features as well a deployment of version to various app stores. The Web Api uses Docker for deployment to our in-house servers.
- I was charged with developing an Ordering Service for Dairybelle restaurants using WhatsApp's chat API and Meta's commerce capability.
- DairyBelle's Order Bot is in the early stages of development but would essentially allow users to order via WhatsApp and receive regular updates on their order. It would also be integrated with loyverse point of sale (POS) allowing easy changes to menu and prices.

Neptune Mining
Website design and development   *June 2023*
- Design a modern and sophisticated website that aligns with company's incentives. This involved creating a mockup on Adobe Illustrator and then communicating with clients on any changes and requirements.
- Development of the website used Angular, HTML and CSS and involved making sure the site is responsive and working at optimum speed.
- SEO was also used to ensure any searches for company related information and service will show in their respective area.
- Through this process I was able to establish a legitimate online presence that allows the company to take a step in the right direction.

Kisasa Holdings
Freelance Logo Design.   *February 2023*
- Design and create a public logo for Kisasa Holdings.

- Used Agile methodologies to communicate clients' needs and development progress.
- Receiving positive feedback from Marketing and Merchandising.
- By using Adobe Illustrator and my knowledge of styling in Front-end capacity I was able to create a simplistic and dynamic logo for Kisasa Holdings.

Website Design and Development.
- Consulting for company website design, build and development procedures.

Personal Portfolio - View Portfolio

FitX Ecommerce Store   *January 2023*
- Fully functional Ecommerce store.
- Build in Angular using Rest Api's connected to Sql database.
- Api's built in Asp.net framework using c#.
- Tools used: HTML, CSS, JavaScript, TypeScript, C#, Angular, Sql server, Git and Github.
